STATIC TEXT

Hello ,,,
A team of researchers from the University of Guyana and the Bureau of Statistics is conducting a survey for the Government of Guyana to learn about women's health and life experiences. You and many other women have been chosen by chance to participate in the study.

The questionnaire will include questions regarding your general health and life experiences including incidents of violence. Some of the topics may be personal and difficult to discuss, but many women have found it useful to have the opportunity to talk. You have the right to skip any questions that you don't want to answer or to pause or stop the interview at any time. There are no right or wrong answers.

I want to assure you that all of your answers will be kept strictly confidential. I will not keep a record of your name or address. Your participation is completely voluntary, but your experiences could be very helpful to other women in Guyana. The information you provide will be anonymously combined with that of women aged 15-64 from around the country to inform policies and programmes that will benefit women and girls.

In order to protect your privacy, depending on the topic of the interview, if anyone enters the room while we are talking, we may stop the interview or change questions. We don't want you to feel under any pressure to talk to us, especially if you're worried that it might be risky for you. Please take a few moments to consider whether talking to us may increase your risk of violence, whether at home or in your community. We want to ensure you that you are as safe as possible if you do choose to participate. Do you have any questions?
